

**To us, green isn't
a marketing trend.**

It's a way of life.

Sanus Systems has been rooted in green practices since 1986 – always maintaining the highest quality you expect from us. But we don't do it to be trendy or as a façade to cut corners. We've simply been green all along, because it's the right thing to do.

For more ways Sanus is branching out, go to green.sanus.com

Commitment to sustainability is in our roots.
