

## The Sanus range of Wall Mounted Furniture

### VF2012 - Wall-Mounted Furniture

#### Single-column AV component system with two shelves

The Sanus Vertical Foundations VF2012 is a single-column AV component system that mounts directly under wall-mounted TVs for a sleek, streamlined look. Its large center column is vertically adjustable for perfect alignment under a wall-mounted TV, even after hanging. The center column features two integrated channels with over four square inches of space for easy power cable and signal wire routing.

### VF2022 - Wall-Mounted Furniture

#### Double-column AV component system with two shelves

The Sanus Vertical Foundations VF2022 is a double-column AV component system that mounts directly under wall-mounted TVs for a sleek, streamlined look. Its two columns are vertically adjustable for perfect alignment under a wall-mounted TV, even after hanging. Each column features two integrated channels with over four square inches of space for easy power cable and signal wire routing. Thick tempered-glass shelves support up to 34 Kg each and can be vertically adjusted to accommodate any AV component arrangement.

### VF5022 - Wall-Mounted Furniture

#### AV component system with two shelves

The Sanus Vertical Foundations VF5022 is an AV component system that mounts directly under a wall-mounted TV for a sleek, streamlined look. Specially designed brackets simplify installation by providing both lateral and vertical adjustment, even after hanging. Cable management channel easily routes cabling behind unit. The VF5022 includes two interchangeable back panels in black glass or mocha-finished wood to match any home décor. Back panels are easily removed for easy access to wall outlets and surge protector. Two thick tempered-glass shelves support up to 34 Kg each and can be vertically adjusted to accommodate any AV component arrangement.

### VF5023 - Wall-Mounted Furniture

#### AV component system with three shelves

The Sanus Vertical Foundations VF5023 is an AV component system that mounts directly under a wall-mounted TV for a sleek, streamlined look. Specially designed brackets simplify installation by providing both lateral and vertical adjustment, even after hanging. Cable management channel easily routes cabling behind unit. The VF5023 includes two interchangeable back panels in black glass or mocha-finished wood to match any home décor. Back panels are easily removed for easy access to wall outlets and surge protector. Three thick tempered-glass shelves support up to 34 Kg each and can be vertically adjusted to accommodate any AV component arrangement.
